The Hiring Manager Stripe

Subject: Application for Software Engineer Intern

Dear Hiring Manager,

I am writing to express my interest in the Software Engineer Intern position at Stripe. I am currently pursuing a Bachelor of Engineering in Computer Science at Sona College of Technology, with a strong academic foundation (CGPA 8.11/10) and practical experience in full-stack development, data structures, and algorithmic problem-solving using Java and Python.

Through my academic journey and hands-on projects, I have developed a deep interest in building scalable, efficient, and impactful software systems. My work on projects such as "Capture the Flag", a MERN-based cybersecurity game, and "Smart Specs", a healthcare IoT device using Flutter and Firebase, strengthened my problem-solving and backend development skills. Additionally, during my AI Internship at ZAdroit IT Solutions, I gained valuable exposure to AI-driven projects and collaborative development in multi-functional teams.

I am particularly inspired by Stripe's mission to simplify financial infrastructure and empower businesses globally. I admire Stripe's engineering culture that values clean code, continuous learning, and collaboration — values that I actively practice through hackathons, internships, and open-source-inspired projects. My ability to learn quickly, communicate effectively, and write production-ready code aligns strongly with the expectations of this internship role.

I am eager to contribute to Stripe's innovative environment, collaborate with world-class engineers, and grow both technically and professionally while making meaningful contributions to Stripe's impactful products.

Thank you for considering my application. I look forward to the opportunity to discuss how I can contribute to Stripe's mission.

Warm regards,

Harinee V S
